

# CONTENTS

Abstract .....	1
Introduction .....	1
Purpose and Scope .....	3
Description of Study Areas .....	3
Methods of Study .....	4
Site Selection .....	4
Sampling Methods .....	4
Statistical Methods .....	6
Background Characteristics and Statistical Comparisons .....	6
Water Quality .....	6
Streambed Sediment .....	9
Biological Characteristics .....	12
Fish Tissue .....	12
Habitat Characteristics .....	12
Invertebrate Community .....	15
Summary .....	16
References .....	17

# FIGURES

1. Maps showing study areas, stream-water quality, streambed-sediment, and biological sampling sites for investigation of background characteristics .....	2
2-5. Photographs showing:	
2. Aquatic invertebrates, such as the Hellgrammite, were surveyed as part of the biological investigation .....	3
3. Big Spring and Greer Spring, two large springs with recharge areas in the exploration area .....	4
4. The Eleven Point River at Turner's Mill sampling site, looking downstream, 2001 .....	5
5. Hurricane Creek at the Ozark Trail sampling site, looking downstream, 2001 .....	5
6. Graph showing bacteria density at the sampled sites, 1995 and 2001 .....	9
7. Hierarchical clustering using Euclidean distances and single linkages for invertebrate community data collected in the Viburnum Trend and exploration study areas, 1995 and 2001 .....	16

## TABLES

1. Water-quality data from sites sampled in the Viburnum Trend and the exploration study areas, 1995 and 2001.....	7
2. Streambed-sediment data from sites sampled in the Viburnum Trend and the exploration study areas, 1995 and 2001.....	10
3. Trace element concentrations in fish tissue samples from the Viburnum Trend and the exploration study areas, 1995 and 2001.....	13
4. Habitat characteristics of sites sampled in the Viburnum Trend and the exploration study areas, 1995 and 2001.....	14
5. Abundance and diversity data for invertebrate samples in the Viburnum Trend and the exploration study areas, 1995 and 2001.....	15
6. Pearson correlation matrix for invertebrate samples collected from each sampling site.....	15

## VERTICAL DATUM

Vertical coordinate information is referenced to the National Geodetic Vertical Datum of 1929 (NGVD 29). Elevation, as used in this report, refers to distance above or below NGVD 29. NGVD 29 can be converted to the North American Vertical Datum of 1988 (NAVD 88) by using the National Geodetic Survey conversion utility available at URL <http://www.ngs.noaa.gov/TOOLS/Vertcon/vertcon.html>.
