

Table ES-1  
Remedial Action Objectives and General Response Actions  
Operable Unit 1 (Front Street site), Riverfront Superfund Site  
New Haven, Missouri

<b>Groundwater</b>	
<b>Remedial Action Objectives</b>	<b>General Response Actions</b>
<p>-For the protection of human health:</p> <p><i>Prevent exposure to groundwater with contaminant levels greater than MCLs. For those contaminants without established MCLs, prevent exposure to groundwater with contaminant concentrations which result in an excess cancer risk greater than <math>1 \times 10^{-6}</math>, or a Hazard Quotient greater than 1.0, whichever is less.</i></p>	<p>--No Action --Institutional Controls --Natural Attenuation --Containment --Removal Treatment --Disposal</p>
<p>-For protection of the environment:</p> <p><i>Minimize further migration of the groundwater contaminant plume.</i></p>	
<b>Soil</b>	
<b>Remedial Action Objectives</b>	<b>General Response Actions</b>
<p>-For the protection of human health:</p> <p><i>Prevent exposure to soil containing contaminants at concentrations which result in an excess cancer risk greater than <math>1 \times 10^{-6}</math>, or a Hazard Quotient greater than 1.0, whichever is less.</i></p>	<p>--No Action --Institutional Controls --Natural Attenuation --Containment --Removal Treatment --Disposal</p>
<p>-For the protection of the environment:</p> <p><i>Reduce the soil contaminant levels, or prevent migration of soil contaminants, to provide protection of groundwater.</i></p>
